SKILLS

Languages:	C, C++, Python
Tools/Platforms:	MATLAB - Simulink, Proteus, Arduino IDE
Core Skills:	Power Systems, Electrical Machines, Power Electronics
Soft Skills:	Problem-Solving, Teamwork, Analytical Thinking, Project Management, Adaptability

PROJECTS

AI-Based Power System Monitor and Protection <i>Machine Learning, ESP32, Sensors, Relay.</i>	Apr' 2026
- To develop an intelligent fault identification system capable of detecting abnormal operating conditions and classifying different faults in an electrical power network using measured electrical parameters. - Developed a data-driven classification framework by collecting voltage and current parameters, preprocessing electrical data and training it to distinguish normal and different fault conditions. - Achieved automated fault identification and classification, demonstrating the use of AI for faster fault analysis and improved power-system reliability.	
BI-Copter <i>Arduino, BLDC Motors, ESC, PID Control</i>	Jun' 2025
- To design and develop a two-rotor aerial vehicle capable of maintaining balance, stable flight, and controlling movement through continuous feedback-based correction. - Built and integrated the prototype using BLDC motors, ESCs, propellers, an Arduino controller, and orientation sensors, while implementing and tuning a PID algorithm for real-time motor-speed adjustment. - Achieved controlled and stable flight performance through PID tuning, hardware integration, and troubleshooting of vibration and alignment issues.	

TRAINING

Tenughat Thermal Power Station (TTPS) Link	22 Jun 2026 – 28 Jul 2026
- Worked as an Intern in a thermal power plant, gaining practical exposure to electricity generation and plant operations, including various electrical equipment and power-system process - Learned about boilers, turbines, generators, transformers, switchgear, and protection system used in power generation, along with their functions in the overall plant operation. - Gained an understanding of power generation, transmission, and maintenance, supporting my career in power systems and electrical engineering through practical industrial exposure.	
Electric Loco Shed Bokaro, Jharkhand Link	26 Aug 2024 - 25 Sept 2024
- Worked as a Trainee in electric locomotive maintenance, gaining practical exposure to locomotive equipment, inspection, and safety procedures along with basic maintenance practices. - Gain Knowledge about traction motors, transformers, converters, circuit breakers, pantographs, and braking systems and their functions in locomotives, including their role in safe and efficient operation. - Improved my troubleshooting and maintenance skills, providing a strong foundation for a career in electrical engineering and technical support through practical exposure to locomotive systems.	

CERTIFICATES

Cybersecurity Analyst Job Simulation <i>Tata Group, Forage</i> Link	Jul' 2026
MATLAB Onramp <i>MathWorks Training Services</i> Link	Jan' 2026
Programming in C <i>Infosys Springboard</i> Link	Jan' 2026

ACHIEVEMENTS

Patent Published BI-COPTER Published a patent based on the development of a two-rotor aerial vehicle.	Dec' 2025
Mathematics Quiz Winner Silli Polytechnic, Silli Secured 3rd prize in a Mathematics Quiz competition.	Dec' 2022

EXTRACURRICULAR ACTIVITIES

LPU Hackathon 2.0 Participated in the hackathon, demonstrating teamwork and problem-solving skills.	Apr' 2026
--	-----------

EDUCATION

Lovely Professional University Bachelor of Technology in Electrical Engineering CGPA: 8.53	Phagwara, Punjab Aug' 25 – Present
Silli Polytechnic, Silli Diploma in Electrical Engineering Percentage: 80.44	Ranchi, Jharkhand Sept' 22 – June' 25
Krishna Sudarsan Central School (CCL) Matriculation Percentage: 87.4	Bokaro, Jharkhand Mar' 21 – Apr' 22
